HOUSEKEEPER :

Mrs. C. ARMSTRONG.

MATRON :

OLIVE M. BROWN.

ASSISTANT MATRONS :

Miss MARTHA L. McKIBBEN,

Miss ANNIE THOMPSON.

REPORT OF THE TRUSTEES.

To His Excellency RICHARD M. BISHOP, *Governor of Ohio :*

DEAR SIR: The Trustees of the Ohio Institution for the Education of the Blind present to you their forty-second annual report, together with the reports of the officers of this institution.

By this report it will be seen that another year of prosperity and advancement in the work of education of the blind of the State has been experienced, and the institution, in many respects, is in a better condition than it has been since its organization.

Many prominent improvements have been made, but still there are more needed, to keep pace with the increasing number of pupils, and their consequent wants, and the wear and tear of time.

Health demands that more perfect ventilation should be given to the basement of the building, by constructing a row of windows on the front, to correspond with windows already provided for that purpose in the rear; a large amount of outside painting is required; the tin-roofing, cornices, cupolas, window-frames and caps are decaying rapidly for the want of a protective coat of paint; the State will lose largely by permitting it to remain without immediate attention.

Prominent among the household necessities is a large supply of bedding and bed-clothes, to replace those worn out by time and constant use; many of the rooms need repairs, such as painting, plastering, and kalsomining.

The institution, in itself, is a model of beauty, usefulness, and munificence on the part of the State to the unfortunate blind within her borders, and only needs the addition of the three acres on its north, now owned by Mr. Parsons, to be complete, and stand superior to any edifice of its kind in the United States, in structure and in grounds. The institution now owns a large plot of land, situated on Town street, containing some five acres; it should be sold, and the proceeds of such sale applied to the purchase of the beautiful plot above mentioned. Previous reports of this institution have suggested the necessity of this purchase, and we hope and urge that the State will no longer delay in securing it, while it may yet be had at a fair price.

The number of pupils are largely on the increase, the present enrollment being one hundred and seventy-eight, with every assurance that there will be two hundred inmates before the close of the term.

We respectfully ask your attention to the report of G. L. Smead, the Superintendent, in regard to the culture and interests of the blind, and would add that as an instructor he possesses every qualification necessary to a superintendent of an institution of this kind.

We would likewise invite your attention to the report of the Steward, Mr. John McCarty, who exhibits in his report how and to whom the money appropriated for the use of the institution has been paid out during the past year, and would say that he has shown himself to be a judicious manager, meting out the State's money to the wants of those he has to provide for, with economy and discretion.

We cannot close our report without referring to a new and pleasing feature recently established, viz.: A kindergarten. It is under the direct supervision of Miss Mary S. Redick, an accomplished teacher of the institution. It is yet in its infancy, but is doing finely, and promises to be a great help in the early education of the young blind. For further particulars, see report of Superintendent.

During the fiscal year ending November 15. 1878, we entered into contract with the "Tunnel Coal and Coke Company," for coal, at \$1.69 per ton for lump coal, to be delivered at the institution.

We have not entered in any contract in regard to supplies of any kind relating to meats, flour, sugar, coffee, butter, etc., for the reason that most of the articles above mentioned are constantly fluctuating in price.

We respectfully ask for the following appropriations :

Current expenses.....	\$36,500 00
Salaries.....	12,108 48
Repairs and improvements.....	3,920 85
Organ for chapel, additional.....	500 00
Furniture.....	1,466 52
Improving grounds.....	844 44
Musical instruments and school apparatus.....	1,369 50
Improving streets.....	1,500 00
Parsons' land.....	25,000 00
	<hr/>
	\$83,209 79

All of which is respectfully submitted,

JOS. FALKENBACH,
W. R. WING,
C. BLASER,
S. D. HOUP,.
HARMON AUSTIN,
Trustees.

REPORT OF THE SUPERINTENDENT.

Gentlemen of the Board of Trustees :

I herewith submit the report of the institution for the past year.

A good degree of success has been attained in the study and work of the term. We cannot put upon paper all that is done in an educational institution like this.

The most important results are the culture and discipline of the pupils; their growth in power of thought and in power of expressing thought; their discipline in right feeling, and in right habits and principles of life, and the greater power to live up to those principles. For securing these results, we depend upon the instruction of the teachers in the class and work rooms; upon the influence of the matrons and other officers upon the boys and girls as they may meet them and care for them in sickness and in health; upon the influence of the employés as they perform their work and come in contact with the pupils, and upon the influence of the pupils over each other in their intimate associations.

Although we cannot express in figures, nor give in words all that has been achieved the past term, yet we believe that progress has been made in all that we should strive for in the development of mind and character; enough progress to show the value and importance of right example and influence on the part of all connected with the institution, whether officers, employés, or pupils.

The following tables will show the number of pupils, average age, causes of blindness, and other matters of information and interest.

RECORD OF LAST TERM.

New pupils entered—males, 23; female, 18; total	41
Average attendance	145
Number enrolled—males, 109; females, 103; total.....	212

RECORD FOR THE FISCAL YEAR ENDING NOVEMBER 15.

New pupils entered—males, 30; females, 18; total.....	48
Average attendance	156
Number enrolled—males, 116; females, 109; total	225

RECORD OF THIS TERM TO NOVEMBER 15.

New pupils entered—males, 21; females 12; total	33
Average attendance	162
Number enrolled—males, 87; females, 85; total	172
In attendance November 15	170

AVERAGE AGE, ETC., OF THOSE PRESENT NOVEMBER 15.

Average age of males	16
“ “ females	17
“ “ whole school	16½
Under 21 years of age	137
Over “ “	33
	— 170

The following are the causes of blindness of the pupils entered this term, so far as known :

Small-pox	3
Keratitis	2
Congenital	6
Ulceration of cornea	3
Conjunctivitis	1
Measles	1
Injury	2
Ophthalmic neonatorum	5
Amaurosis	2
Hydrocephalus	1
Inflammation	1
Verymyopia	1
Spotted fever	1
Unknown	4
Total	33
Totally blind	14
Partially blind	19
Total	33

The following table will show how our pupils are employed every day :

Arithmetic	158
Reading	78
Spelling	84
Writing	48
Geography	39
Grammar	27
Algebra	17
Natural Philosophy	28
History of United States	37
General History	18
Chemistry	15

Latin	12
Geometry	13
Vocal music	103
Thorough bass	45
Orchestra	24
Piano practice	106
Cabinet organ	24
Large organ	11
Violin	22
Piano-tuning	9
Cane-seating	50
Broom-making	50
Hand-sewing	51
Machine-sewing	17
Bead-work	34
Crochet work	14
Hand-knitting	8
Kindergarten	28
Normal class in music	14
Practicing upon wind instruments	6

The knitting-machine has just been introduced, and one pupil is receiving instruction, with good prospect of success.

It will be seen by the catalogue that sixty-four counties are represented by pupils in attendance last term and this term to November 15, as follows :

Counties.	No.	Counties.	No.
Adams	2	Geauga	1
Allen	1	Greene	2
Ashland	3	Guernsey	29
Ashtabula	2	Hamilton	1
Athens	2	Hancock	4
Auglaize	3	Hardin	2
Belmont	1	Harrison	1
Brown	2	Henry	1
Butler	2	Highland	1
Carroll	2	Hocking	1
Champaign	1	Holmes	1
Clarke	2	Huron	1
Clermont	1	Jackson	7
Clinton	2	Jefferson	5
Columbiana	2	Knox	1
Coshocton	3	Lake	4
Crawford	15	Lawrence	2
Cuyahoga	2	Licking	3
Darke	2	Logan	5
Defiance	2	Lorain	1
Delaware	2	Lucas	3
Erie	1	Madison	2
Fairfield	25	Madison	1
Fayette	2	Mahoning	3
Franklin	2	Marion	2
Fulton	2	Medina	1
Gallia	2	Meigs	1
		Mercer	1

Counties.	No.	Counties.	No.
Miami	---	Sandusky	2
Monroe	---	Scioto	1
Montgomery	4	Seneca	5
Morgan	---	Shelby	1
Morrow	1	Stark	4
Muskingum	2	Summit	---
Noble	---	Trumbull	2
Ottawa	---	Tuscarawas	3
Paulding	---	Union	---
Perry	6	Van Wert	---
Pickaway	4	Vinton	---
Pike	---	Warren	3
Portage	1	Washington	5
Preble	---	Wayne	2
Putnam	1	Williams	---
Richland	1	Wood	4
Ross	4	Wyandot	2

It will be seen by the record of this term that the number of pupils in attendance November 15, was one hundred and seventy—twenty-nine more than on November 15, 1877; also, that the number of new pupils entered this term up to November 15 was thirty-three, against twenty-nine at the same time last year. The increase is not chiefly due to the admission of so many more pupils, but comes from granting to several pupils who had finished their regular course an additional term, and also from a change in the law by which pupils admitted under twenty-one can have seven years in the institution. This change enabled several pupils to go on with their education whose time would otherwise have ended last term.

Sixty-four of the eighty-eight counties in the State have been represented by one or more pupils in the institution during last term, and this term to November 15.

Last year sixty counties were represented. Some gain has been made in making known the institution and in persuading parents to allow their blind children to attend the school. There are twenty-four counties not represented.

If there are any blind children in those counties of proper age and mental capacity, they ought to be enjoying the privileges of the institution. I would again request all public men and others who know of blind persons of proper age and mental capacity in their several counties, to try to induce them to apply for admission to this institution.

During the past year no death has occurred among the pupils of the institution, but a sad calamity came upon us in the sudden death of Mr. Geo. B. Lindsay, for fourteen years a teacher in the institution. Mr. Lindsay was thrown from a carriage on October 29, last, and fatally

injured. In his death the institution has suffered a great loss. By long and faithful experience, added to good natural ability, Mr. Lindsay had become a skillful and successful teacher of the blind. As a blind man, he was an example to the blind of the State of christian courtesy, of energy, and faithful perseverance in his chosen profession.

Such examples we can not well afford to lose, and we hope that the memory of his sincere and faithful life may be an inspiration for good to all who knew him and loved him.

The following are the preamble and resolutions adopted by the pupils of the institution, expressive of their sorrow for the death of their dearly beloved teacher :

WHEREAS, In view of the sad death of Mr. George B. Lindsay, our dear friend and faithful teacher ; be it

Resolved, That we do mourn his loss, and shall ever cherish his memory.

Resolved, That from his example of Christian perseverance and fidelity to duty, we have learned a lesson not soon to be forgotten.

Resolved, That, in our lives, we shall endeavor to show gratitude to God that it has been our privilege to have such Christian influence, and so dear a friend.

Resolved, That we, as pupils of his several classes, with a deep conviction of what we owe to his patient and thorough instruction, would here place on record our testimony to his remarkable ability as a teacher, and sympathetic worker for the blind.

Resolved, That we, as members of the Philomathean Society, would hereby testify our grateful sense of Mr. Lindsay's ability and energy as one of the founders of this society, in 1862, and its first regularly elected President, and also to his value as an acting member for many years in all duties pertaining to such membership.

Resolved, That we tender our sympathy to the family and friends of the deceased, and that a copy of these resolutions be forwarded to them, be included in the minutes of the society, published in the Philomathean Argus, in the Ohio State Journal, in the Perrysburg Journal, and in the annual report of the institution.

MILA E. SELDEN,
FRANK LUMB,
J. P. HANLEY,

Committee.

Mr. Frank Lumb, a former pupil of the institution, has been appointed to the place made vacant by this sad bereavement.

Some other changes in teachers and officers have occurred.

Miss Mary S. Rediek, of Findlay, O., and Miss Lizzie Armstrong, of Waverly, O., have been employed as teachers. Mr. John McCarty, of this city, has taken the place of Steward, and Miss Annie Thompson, of Logan, O., is Assistant Matron on the boys' side of the house.

Miss Rediek has fairly inaugurated the kindergarten. We have much hope that this will be of great benefit to the children of the institution. A blind child is more dependent than other children upon special instruction for his knowledge of common things, and of what belongs to

good breeding. A child with vision can see at once any one of a thousand common things that a blind child never gains a knowledge of, unless some one brings the object to him, allows him to handle it, and explains its properties and uses. A seeing child can observe at once the proper or improper behavior of those whom he meets, and learn to imitate the one or avoid the other. Still, with all the advantages of sight, we know that all children must have these things impressed upon them by oft repeated injunctions. Much more does a blind child need to be taught, by precept upon precept, what belongs to good manners in the common associations of life.

Without special instruction, a blind child is likely to grow up without learning the proper use of his hands. He may be awkward in his gait, or may acquire bad habits in position and motion. Neglected blind children often have uncouth motions, which are very disagreeable to people of refinement, and may very much hinder their success in after-life.

We hope that the exercises and instruction of the kindergarten will help very much in forming good habits among our children, and in eradicating bad ones, so that they may grow up free from those *added* defects and blemishes which sometimes stand seriously in the way of a blind person gaining employment or patronage in any profession in which refinement of manners is justly expected.

We have added, during the past year, a set of acoustic and other philosophical apparatus, which will be a great help in the pursuit of the studies it is intended to illustrate. We have, also, procured some kindergarten apparatus, adapted to the blind. We are still in need of additional apparatus for the geography classes. We need, also, more musical instruments, especially pianos. In the use we must give to pianos (from 10 to 13 hours a day), they will wear out rapidly, and, hence, must be often repaired, and new ones must be obtained. We have scarcely enough now to meet the increased demand for practising hours, as the number of pupils has increased. We, therefore, ask for an appropriation for school apparatus and musical instruments.

The organ which was placed in the chapel last year, by Mr. Gemünder, of this city, is in use 11 or 12 hours a day. The hydraulic engine used for pumping the organ is a success, doing away entirely with muscular power.

The convention of American Educators of the Blind, which met at this institution August 21-23, was a very pleasant occasion to all connected with the household. Twenty-six institutions were represented; and many teachers of the blind and officers of the institution came with

the regular delegations, thus adding to the social enjoyments of the occasion and also to the profit derived.

This American Association of the Educators of the Blind includes all the institutions of the United States, Canada, and Nova Scotia, and any other institutions in America. Mr. F. J. Campbell, of the Royal Normal College, England, was also present.

The growth of our country and the consequent increase of the blind, and of institutions for their education, make the care and training of persons deprived wholly or partly of sight a very important matter for the consideration of the legislator, of the educator, and of the philanthropist. In the institutions of the country there are about two thousand and two hundred and ninety-two blind persons receiving an education or being trained in some handicraft. But this number is only about one-tenth of all the blind in the country. Fully one half of the blind lose their sight after reaching the age of majority. Of blind persons over twenty years of age, one-half are over fifty. So it will be seen that our institutions are educating but a small minority of the blind, and that this will continue to be the case, because so many became blind so late in life that they either have obtained their education or are too old to be profited by attending school. Still there are many of these adult blind who can learn a trade by which to support themselves wholly or in part, and many of them are availing themselves of the privileges granted by some of our institutions, and many more would do so if they could have any prospect of obtaining means of starting in any trade which they should learn or of getting employment from any one else.

What to do with those who have been educated at our institutions, that they may be self-sustaining, is a problem; and what to do for that larger number who never enter our institutions is a question also. Many of them are in good circumstances, not needing our attention. But many are needy, yet able and willing to learn some trade if they could be assured of earning something when the trade was learned.

We need, in at least our larger States, industrial establishments where the adult blind can go and learn a trade and be employed either permanently or until they can earn enough to set up business. To which a blind person can go and earn a part of his support, if he cannot earn the whole, and have made up to him what he lacks.

It is for the interest of the community that every class of the population should be, so far as possible, self-sustaining. If a blind man can be put in the way of earning his own living by a little expense, it is better for the public that this be done rather than support him in idleness; if he can be assisted a little, so that he may partly support himself, even this is better than nothing.

And how much better it is for the man to feel that he is supporting himself at least in part to have the consciousness that he is doing his best, rather than sitting down in adject idleness, a burden to himself and to society.

The following table compiled by a committee of the American Association of Educators of the Blind, and reported at the last convention, will show a summary of the occupations pursued by the blind who have received education and training in American institutions so far as known :

Occupations.	Males.	Females.	Total.
Superintendent of institutions for the blind	16	16
Superintendents of orphan asylums	4	1	5
Teachers of literature and science, outside of institutions	26	19	45
Teachers of music and literature in other institutions for blind	9	13	22
Teachers in public schools	7	3	10
Students in literary college	7	7
Graduates from literary college	13	1	14
Students in theological seminary	2	2
Graduates from theological seminary	3	3
Ministers of the gospel	34	34
Attorneys-at-law	3	3
Justices of the peace	1	1
Editors	1	1
Authors	7	5	12
Publishers	5	2	7
Medical students or physicians	5	1	6
Agents and lecturers	64	1	65
Teachers of music, otherwise than in institutions	131	83	214
Organists in churches	59	10	69
Vocalists and teachers of singing, outside of institutions	58	27	85
Piano tuners, not including pupils	124	1	125
Composers and publishers of music	9	3	12
Teachers of handicraft in other institutions	16	3	19
Manufacturers, employing others	28	28
Manufacturers	197	20	217
Working at handicraft, elsewhere than in institutions	599	74	673
Storekeeping, selling wares, and trading	267	10	277
Owning and managing real estate	38	7	45
Sawing and lumbering	7	7
Farmers	38	1	39
Knitting-machine operators and teachers, outside of institutions	1	1
Employed by sewing-machine company	2	2
Housekeepers, or at housework	179	179
Hotel keepers	1	1
Insurance brokers	2	2
Newspaper vendors	7	7
Employed in printing office	2	2
Employed in sash and blind factory	1	1
Florists	1	1
Switch-tenders	2	2
Cabinet-makers	2	2
Mail contractors and carriers	1	1
Assistants in restaurants	1	1
Sailor and cook	1	1
Horse dealers	9	9

Occupations.	Males.	Females.	Total.
At home: at machine and plain sewing, housework, chores, etc	46	535	581
At any home or institution for employment	39	39	78
Imbecile or incapacitated	55	63	118
Deceased	242	189	431
Unknown	382	224	606
Remaining pupils	1198	1094	2292
Total admissions to the institutions	8942

By the foregoing table it will be seen that there have been admitted to the institutions of North America 8,942 pupils, and that 2,292 pupils still remain in those institutions. There are thirty institutions for the blind in North America. This would give an average of 298 for the total admissions, and 76 still remaining. Fully one-tenth of those who have had the advantages of these institutions are known to be engaged in some handicraft as workmen, teachers, or employers, and probably many of those "unknown" are engaged in the same pursuits. This certainly is suggestive as to the value of industrial pursuits to the blind, that trades ought to be taught in all our institutions, and that working-homes should be established to afford facilities to the needy blind to learn and work at some trade.

These questions are certainly worthy of our consideration as those who have the care and education of the blind under our charge, and also worthy of the attention of our legislators, to whom we look for the necessary means for accomplishing the ends which charity proposes.

We would close this report with expressions of gratitude to the Legislature and the good people of this State, who through their law-makers have so liberally supported this institution, and to you, gentlemen of the Board, for the interest which you have taken in the institution and the care with which you have looked after its interests.

Respectfully submitted,

G. L. SMEAD, *Superintendent.*

REPORT OF THE PHYSICIAN.

COLUMBUS, OHIO, *March 15, 1878.*

Gentlemen of the Board of Trustees :

I here report the sanitary condition of the institution. During my term as physician, there have been about sixty cases of catarrhal sore throat, a few cases of diphtheria and malarious fevers, which rapidly recovered under treatment. I call your special attention to the badly ventilated condition of the front basement of the building. The want of a free current of air causes a dampness and unhealthy condition of rooms on the first story. In behalf of the many homœopathists of Ohio, I most cordially thank your honorable body for this recognition of our school of medicine.

Respectfully submitted,

J. R. FLOWERS,
Physician.

REPORT OF THE STEWARD.

To the Board of Trustees :

GENTLEMEN: In compliance with a rule in this case made and provided, it becomes my pleasurable duty to submit to you herewith my annual report, thereby rendering an account of my stewardship for the fiscal year ending November 15, 1878.

In it will be found a full and true statement of the disbursements of the various appropriations granted for the use of this institution by the Legislature of the State, as also past balances remaining in the treasury, and present ones, where such exist; you will find, besides, an account of all receipts of money, and for what received.

The chief appropriation, that for "current expenses," has been drawn upon for the sum of \$30,000, the actual expenses under this head being \$29,727.31. This expense exceeds last year's report of the expenses of the same appropriation by \$1,126.17, but there are several good and sufficient reasons why it should be so. The greatest and most apparent reason is the largely increased number of pupils, and when by the comparison of the average attendance this year with that of the past, I prove to you that the expenses have been reduced to a fraction under three dollars less per pupil, you will not be astonished at the excess stated. As, for instance, the average attendance last year was placed at 150 pupils, at a cost of \$262.90 each per year. Placing the number of pupils this year at 156, and adding to actual expenses of \$29,727.31 the salaries amounting to \$10,825.28, making a total of \$40,552.59, the cost per pupil is but \$259.95, or nearly three dollars less on each pupil per annum.

Still another and good reason for the excess in expenditure is the fact that for several days at the time of year when vacation usually occurs, we entertained as guests an assemblage of very learned people, who resolved themselves into a convention for the purpose of advancing the interests of the blind people, by making improvements in past methods and suggesting new ones for their education in the future. Full accounts of their proceedings were published by the newspaper fraternity at the time.

Again, and for a last example, other appropriations allowed this year were so small that purchases made, which should have been in their line, had to be paid out of the appropriation for current expenses.

Of the other appropriations, it appears to me that but few remarks are necessary for me to make, so I simply invite your perusal of the report, extending a like invitation to all whom it may concern.

In consequence of having but five months of the past year under my administration, I deem it best to refrain from making any extended tabular statement showing the cost of maintenance per capita in all its forms; but by judiciousness in purchasing and care in managing, I expect in my next annual report to give a showing that will compare most favorably with any public institution in this or any other State.

I estimate my supplies on hand as follows:

Coal to the amount of	\$550 00
Brooms and broom material.....	250 00
Hay, oats, and corn.....	40 00
Groceries and provisions	400 00
Beads and bead wire.....	60 00

Very respectfully, yours,

JOHN McCARTY, *Steward.*

RECEIPTS AND DISBURSEMENTS DURING THE YEAR ENDING NOV. 15, 1878.

RECEIPTS.

Balance on hand November 16, 1877.....	\$1,045 64

SUGGESTIONS.

To the Parents and Guardians of Blind Children and Youth :

The age at which it is best for children to enter the institution depends very much upon the circumstances of the families to which they belong. If they can be under good influences at home, can have the care of mother and sisters, can take exercise in the open air, can be taught the use of words, can learn to count, and to perform some of the operations in arithmetic, and commence learning to read, it is unquestionably better for them to remain at home until they are ten, or perhaps twelve years old; but if they cannot receive proper care, and be taught some of these things, they should come at the age of eight or nine years. Those who enter at this early age need not necessarily attend every year until their pupilage expires. After learning to read, and making a good beginning in other studies, they may spend a year at home now and then, and, by a little aid from their friends, may be constantly improving, or at least be prevented from forgetting what they have learned.

The following are some of the things which may be learned at their homes, as well as after they enter the institution :

1. To count and number, and to add, subtract, multiply, and divide, etc.
2. The multiplication table.
3. To spell common words, beginning with monosyllables.
4. The meaning of common words.
5. The letters in raised print.
6. Items of general information. Every blind child of six or seven years old should know the points of the compass, the name of the town, county, and State in which he lives, the number of counties in the State, and of States in the Union, etc.
7. Facts in geography and history may be added as they can be understood.
8. Hymns, verses of Scripture, and select passages of prose and poetry, which they can understand, should be committed to memory; these will furnish them subjects of thought when they are alone, of conversation when they are in company.
9. Singing common tunes, or playing some simple instrument.

10. There is no reason why a blind child should not commence attending the district or other school with his seeing brothers and sisters, and take part in the exercises in spelling, mental arithmetic, geography, etc.; indeed, in every thing except reading.

Blind children can learn every thing which can be taught by conversation, and by giving them an opportunity to examine and handle objects, just as well as those who have sight; and there is no reason why their education should not be commenced as early as that of seeing children is. Indeed, instead of being neglected because they are blind, they should be taught with more care. During the last ten years, the parents of a number of blind children have written to me, as here requested, and then pursued the course above recommended. The result is that their children enter the institution with as much knowledge and discipline as they could acquire in one or two years of tuition here, and their future progress is much more easy and rapid than that of those who have had no such training at home.

I will furnish a copy of the alphabet, in raised print, to the parents of any blind child who will give me their names and post-office address, and shall take great pleasure in giving any information which they may wish in relation to books or other things pertaining to the instruction of such children at home, or in regard to their admission to the institution. For such information, please address G. L. Smead, Columbus, Ohio.

After pupils have entered the institution, it is important that they should be present every day while they profess to attend. There is but one session in the year. On account of the discomfort and the greater risk of health, etc., to the blind from traveling in winter, it has never been customary to have a vacation or recess at the holidays, and parents are earnestly advised not to encourage their children to think of visiting home at that time. We observe as holidays, Thanksgiving, Christmas, February 22d, and May day. These we endeavor to make as pleasant to the pupils as possible. Between Christmas and New Year the classes go on as at other times, and scholars can not be absent for a week or more then without great loss to themselves, and great inconvenience to teachers; much greater than would be the case with other scholars, because here the instruction is given almost entirely by the teacher, and the scholar who is absent can not make up the missing lessons by studying them from books. The only possible way is for the teacher to sit down and do all the work over again. If this is not done, the pupil must suffer the inconvenience of his loss during the remainder of the term.

It has been our constant aim to secure to our pupils the greatest possible amount of benefit from the limited time allowed them here. For this

purpose, after our younger pupils have attended one or two years, they are advised to remain at home a year or more, and, if practicable, to attend school with their seeing brothers and sisters. Many have done this, and, instead of forgetting what they acquired here, have learned half or two-thirds as much as they would have done in our classes. Besides the advantage gained from their greater maturity when they return, and the consequent ability to understand better what is here taught, and to appreciate the valuable opportunities the institution affords, these children learn much by thus associating with other children; the tendency to imitate manners or habits peculiar to the blind is obviated.

The same plan has been pursued by our older pupils, especially those who expect to engage in teaching; and it has been found that by remaining at home a year or more before spending the last year of their pupilage, reviewing and digesting what they have learned, ascertaining their deficiencies, etc., they are able, when they return, to accomplish as much during their last year as they might have done in two, had they not allowed their minds thus to mature.

The blind are, for the most part, to spend their lives among those who have sight. It should be the aim of all who have the oversight of them to render them as much like the seeing as possible. They should be carefully guarded against forming any habits which will be disagreeable to others. The blind are always noticed by strangers, and their manners and habits observed more particularly than those of other persons; hence it is a very great kindness to them to prevent them from acquiring unsightly habits, or to correct them if such have been formed.

Parents should be especially careful to prevent their boys from forming the habit of using tobacco; its influence on all who begin to use it before reaching maturity is especially injurious, but it is even more so to the blind than to most others. Be assured it is no kindness to them to be allowed to form any such habits.

Much effort has been used to make the opportunities here provided known to the adult blind, and to induce them to enter as soon as possible after the loss of sight. The importance of beginning, as soon as may be, to labor as blind men, can not easily be over-estimated. Every month's delay renders it more difficult for them to learn, and makes them more awkward, to say nothing of the moral influence of idleness, and the feeling of helplessness and dependence which must attend the person who feels that he is doing nothing for himself or others.

It has been customary to encourage our workmen to locate in the neighborhood in which they are acquainted, rather than look to the institution for employment, or to seek it in large towns. The wisdom of this

plan is proved by the experience of every year. A village of a few hundred inhabitants, with the surrounding country population, will usually furnish employment for a broom maker during the year, and the adjacent country will, in most parts of the State, produce all the broom-corn he will need, so that he can obtain his material at very little cost for transportation. For the last twelve or fifteen years hardly an individual of ordinary force of character who has pursued this course, and labored with perseverance and industry, has failed to make a respectable livelihood, while many have succeeded as well as the average of seeing persons.

The experience of many men warrants the statement that any blind man who has energy, and is disposed to be industrious, can in a short time learn to make corn brooms, and become able to support himself. The machinery necessary to carry on this business costs only forty-five dollars. There are now in this State many blind persons who are earning from two hundred to three hundred dollars, or more, each year, instead of being supported in idleness, at a cost to their friends of two hundred to three hundred dollars per year.

ACKNOWLEDGMENT.

For the following papers and periodicals, sent gratuitously to the institution, the proprietors will please accept the thanks of officers and pupils:

Weekly Cincinnati Times, Ladies' Repository, Western Christian Advocate, Herald and Presbyter, Religious Telescope (Dayton), Cleveland Herald, Geauga Democrat, Stark County Democrat, Highland News, Ohio Educational Monthly, Christian Standard, Ohio Statesman, Register and Tribune, Mansfield Herald, Christian Press, Medina County Gazette, Democratic Messenger, Findlay Republican, and Legal Record.

The publishers of these papers, and those of others who are willing so to do, will confer a great favor by forwarding their publications during the coming year.

TERMS OF ADMISSION, ETC.

Applications for admission should be addressed to the "Superintendent of the Institution for the Blind, Columbus, Ohio," and should state the name, residence, and post-office of the applicant's parent or guardian, and the supposed cause of blindness. Applicants must be between the ages of six and twenty-one years. Their time in the institution is regulated by the statute of 1878.

Persons over twenty-one years of age, if free from bad habits, can enter the institution for one year to learn a trade. Persons of this class have an opportunity to hear instructive reading in the evening; they are expected to be present at morning and evening worship, and to attend church on the Sabbath, like other pupils. A man of active mind, and some acquaintance with the use of tools, can learn to make corn brooms in three or four months; some have done it in half that time. Those who have recently lost their sight, and who wish to learn a trade, should come here as soon as possible; every month's delay renders it more difficult to learn.

For residents of the State the school is free, no charge being made for board or tuition; but parents and guardians must provide their children with good and suitable clothing, and pay their traveling expenses, and should also deposit with the Steward a small sum for occasional expenses. For pupils residing out of the State the terms are one hundred and twenty dollars per annum, payable half yearly in advance.

The term commences on the second Wednesday of September, and closes the third Wednesday in June. The proper time for admission is at the commencement of the term.

Vacation continues twelve weeks—from the close of the term in June until the second Wednesday in September. Pupils are expected to spend the vacation at home, or with their friends.

When boxes or packages are sent to pupils, a letter should at the same time be sent by mail, stating distinctly how the same is to come, whether by *stage* or *express*, or as *freight*, and what route.

All letters to pupils should have, after the name, this address—

(Blind Asylum),
Columbus, Ohio.
